Education

Brown University, *BSc. Applied Math-Comp.Sci & Cert. Entrepreneurship, 4.0 GPA* Sept. 2022 – May 2026
Relevant Coursework: Market Research, Data Engineering, Data Science, Statistical Inference, Probability & Optimization, Financial Accounting, Future of Work, Entrepreneurial Processes, Interaction Design

Work Experience

Associate Consultant Trainee

Bain & Company *Seoul, KR* June 2025 – August 2025

- Conducted primary and secondary market research for a global consumer brand, synthesizing 5+ years of pricing, launches, distribution data, and 10+ expert interviews to support Asia-Pacific expansion decisions.
- Built executive-ready Excel models and exhibits consolidating large, unstructured datasets into decision-focused insights under tight diligence timelines.
- Led Python- and Excel-based profitability modeling for a national retail chain, segmenting 80,000+ data points into performance tiers and calculating thresholds beyond standard spreadsheet capabilities.
- Developed and documented a Python analytical tool adopted by client teams; directly presented logic, assumptions, and usage to stakeholders for implementation.

Business Development Intern, Entrepreneurship Track

Hanwha Global Internship Program *Seoul, KR & San Francisco, CA* June 2024 – August 2024

- Co-founded a [Gen Z-focused digital community product](#), collaborating cross-functionally across business, UX, and engineering from problem discovery through MVP launch.
- Conducted bottom-up research (interviews, surveys, competitive analysis) to identify engagement drivers, and inform product positioning and feature prioritization.
- Designed KPI frameworks and experimentation plans to measure activation, retention and habit formation, translating behavioral insights into measurable decisions.
- Pitched the MVP to 4 early-stage venture capital and startup investors in San Francisco, responding to real-time feedback.

Rotational Intern, Project Management & R&D

BrickMate Inc. *Seoul, KR* June 2023 – August 2023

- Managed 4 client-facing digital product projects, coordinating timelines, requirements and communication across designers, engineers and external stakeholders.
- Translated business requirements into user flows, wireframes, and prototypes, leading iterative review cycles and documenting decisions through discovery.
- Implemented structured sprint planning and Jira workflows, improving execution clarity and reducing turnaround time across projects.
- Independently built a machine-learning prototype for music plagiarism recognition, rapidly self-learning required methods and delivering a functioning proof of concept with 98% accuracy on test samples.

Leadership & Extracurricular

Instructor & Division I Black Belt (3rd Dan)

Brown University Taekwondo Team *Providence, RI* December 2022 – Present

- Balanced 20+ hours/week of training with a full academic course load, demonstrating sustained discipline and time management.
- Coached and mentored 100+ student-athletes, managing practice schedules, competition logistics and tournament operations in a high-performance team environment.
- Built and automated attendance, promotion, and competition tracking systems in Google Sheets for 150+ members, improving operational visibility and efficiency.
- Played a leadership role in preparing the team for regional and national competitions, contributing to a National Championship outcome in 2025.

Skills & Interests

Technical Skills: Python, SQL, Excel, Google Sheets, R, MATLAB, Jira, Figma

Professional Skills: Research Synthesis, Analytical Storytelling, Project Execution, Stakeholder Communication, Process Optimization, Stakeholder Communication, Attention to Detail

Languages: English, Korean (Bilingual)

Interests: Music discovery, digital communities, logic puzzles, guitar, art, studying new languages
